

EXPERIMENT WITH BOB VOLCANOES

Make your own erupting volcano!

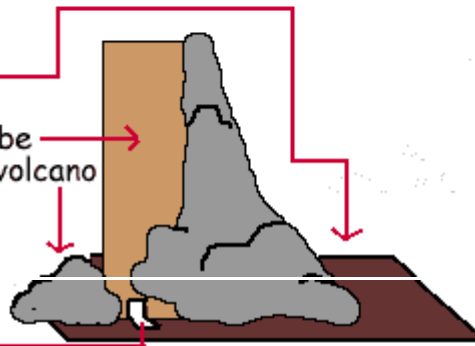

Ever wish you had an active volcano in your own back yard? Well, here's your chance to make that wish come true! Follow these instructions to make your own erupting volcano.

IMPORTANT NOTE:

Do this experiment **OUTSIDE** - it's messy!
And make sure you've got a grown-up to help you.

Here's what you'll need:

- a sheet of cardboard
- tape
- a toilet paper cardboard tube
- enough clay to make your volcano
- baking soda
- clear vinegar
- red food coloring

STEP 1

Use tape to make the toilet paper tube stick upright in the middle of the sheet of cardboard.

STEP 2

Mold the clay around the toilet paper tube in the shape of the flanks of a volcano.

STEP 3

Wait until the clay is dry.

STEP 4

Fill the toilet paper tube with baking soda.

STEP 5

Mix the vinegar and red food coloring together.

STEP 6

Add the vinegar to the baking
soda and step back!
Now watch your volcano erupt!
