

Wyoming Coordinate Map Activity

- Introductory Lesson—(Use with whole group, partner, or individual students.) Eleven sites of interest are shown on a 20 by 20 grid map of a city. The students are to determine the coordinates of the locations using Excel's rows and columns. [Map Coordinates.xls](#)

- Wyoming Map Activity – Students should save a copy of the Excel worksheet. Use the [Wyoming Coordinate Map](#) and instruct students to identify and label the cities on the map. Enter the location coordinates and other data to the mini-worksheet. Then instruct students to add 4 points of interest to their map and add the appropriate data to the mini worksheet.
**Students can check their answers by clicking on the symbol on the map and looking in the name box in the top left corner of the Excel window.
